About Me/Portfolio: <https://www.gordonakinpelu.com/>

## OBJECTIVE

---

With over six years of Quality Assurance testing experience (both manual and automation), and over five years in management/leadership roles, seeking a position that utilizes all skillsets in a rewarding and challenging environment, with a focus on quality assurance, process improvement, adherence, and compliance.

## KNOWLEDGE, SKILLS, AND ABILITIES

---

- **Tech Stack & Tools Experience:** *JavaScript, TypeScript, Protractor, Cypress, Playwright, MySQL, Mocha, Google Tag Manager, BrowserStack, TestRail, JIRA, Confluence, Postman, Screaming Frog, Jira, Confluence, Photoshop, Canva*
- **Industry Experience:** Financial Services, Healthcare, and Mortgage Banking
- **Most notable professional accomplishment:** As a manager in mortgage banking, increased real estate closings year-over-year by 55% by standardizing processes and solidifying best practices, and maintained a team average of 96% quality assurance scores
- **Most notable example of bringing value to a position:** Proactively implemented Cypress.io testing framework when no automation was in use; resulting in a 25% reduction in reported bugs in production the following month after implementation
- **Technical Writing/Copy Experience:** Create user guides and training documents to help bridge knowledge gaps between technical and non-technical departments
- **Web Design Projects:**
